

## **FODMAPs**

(fermentable oligosaccharides, disaccharides, monosaccharides, polyols)

FODMAPs are types of carbohydrates that may be difficult for the body to digest and are in a variety of foods. A low FODMAP diet is not a diet for life. If you suspect FODMAPs are bothersome, it's best to work with your health care provider and a registered dietitian, who specialize in this type of elimination diet, to help create a customized plan. Below is a sample food list that outlines common high and low FODMAP foods.

Food Category	High FODMAP Foods	Low FODMAP Foods
Fruits	<ul> <li>Apples</li> <li>Apple Juice</li> <li>Blackberries</li> <li>Cherries</li> <li>Dried Fruit</li> <li>Mango</li> <li>Nectarines</li> <li>Peaches</li> <li>Pears</li> <li>Plums</li> <li>Waterrmelon</li> </ul>	<ul> <li>Cantaloupe</li> <li>Grapes</li> <li>Kiwi</li> <li>Mandarin</li> <li>Orange</li> <li>Pineapple</li> <li>Strawberries</li> </ul>
